<b>Background</b>	<p>protein phosphatase 2 regulatory subunit B'alpha(PPP2R5A) Homo sapiens The product of this gene belongs to the phosphatase 2A regulatory subunit B family. Protein phosphatase 2A is one of the four major Ser/Thr phosphatases, and it is implicated in the negative control of cell growth and division. It consists of a common heteromeric core enzyme, which is composed of a catalytic subunit and a constant regulatory subunit, that associates with a variety of regulatory subunits. The B regulatory subunit might modulate substrate selectivity and catalytic activity. This gene encodes an alpha isoform of the regulatory subunit B56 subfamily. Alternative transcript variants encoding distinct isoforms have been found for this gene. [provided by RefSeq, Dec 2010],</p>		
<b>Other</b>	PPP2R5A, Serine/threonine-protein phosphatase 2A 56 kDa regulatory subunit alpha isoform
