Background	scribbled planar cell polarity protein(SCRIB) Homo sapiens This gene encodes a protein that was identified as being similar to the Drosophila scribble protein. The mammalian protein is involved in tumor suppression pathways. As a scaffold protein involved in cell polarization processes, this protein binds to many other proteins. The encoded protein binds to papillomavirus E6 protein via its PDZ domain and the C-terminus of E6. Two alternatively spliced transcript variants that encode different protein isoforms have been found for this gene. [provided by RefSeq, Nov 2011],
Other	SCRIB CRIB1 KIAA0147 LAP4 SCRIB1 VARTUL, Protein scribble homolog (Scribble) (hScrib) (Protein LAP4)
