Background	serpin family A member 6(SERPINA6) Homo sapiens This gene encodes an alpha-globulin protein with corticosteroid-binding properties. This is the major transport protein for glucocorticoids and progestins in the blood of most vertebrates. The gene localizes to a chromosomal region containing several closely related serine protease inhibitors which may have evolved by duplication events. [provided by RefSeq, Jul 2008],
Other	SERPINA6, Corticosteroid-binding globulin
