<b>Background</b>	solute carrier family 6 member 15(SLC6A15) Homo sapiens This gene encodes a member of the solute carrier family 6 protein family which transports neutral amino acids. The encoded protein is thought to play a role in neuronal amino acid transport (PMID: 16185194) and may be associated with major depression (PMID: 21521612). Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Feb 2012],
<b>Other</b>	SLC6A15, Sodium-dependent neutral amino acid transporter B(0)AT2
