| <b>Background</b>            | tissue factor pathway inhibitor 2(TFPI2) Homo sapiens This gene encodes a member of the Kunitz-type serine proteinase inhibitor family. The protein can inhibit a variety of serine proteases including factor VIIa/tissue factor, factor Xa, plasmin, trypsin, chymotrypsin and plasma kallikrein. This gene has been identified as a tumor suppressor gene in several types of cancer. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Aug 2012], |
| <b>Other</b>                 | TFPI2, Tissue factor pathway inhibitor 2   |
