

Cleaved-CD97 β (S531) rabbit pAb antibody

Catalog No :	Source:	Concentration :	Mol.Wt. (Da):
A12624	Rabbit	1 mg/ml	91869
Applications	WB,ELISA		
Reactivity	Human		
Dilution	WB: 1:500 - 1:2000. ELISA: 1:5000. Not yet tested in other applications.		
Storage	-20°C/1 year		
Specificity	Cleaved-CD97 β (S531) Polyclonal Antibody detects endogenous levels of fragment of activated CD97 β protein resulting from cleavage adjacent to S531.		
Source / Purification	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.		
Immunogen	The antiserum was produced against synthesized peptide derived from human CD97 beta. AA range:512-561		
Uniprot No	P48960		
Alternative names	CD97; CD97 antigen; Leukocyte antigen CD97; CD antigen CD97		
Form	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.		
Clonality	Polyclonal		
Isotype	IgG		
Conjugation			
Background	<p>adhesion G protein-coupled receptor E5(ADGRE5) Homo sapiens This gene encodes a member of the EGF-TM7 subfamily of adhesion G protein-coupled receptors, which mediate cell-cell interactions. These proteins are cleaved by self-catalytic proteolysis into a large extracellular subunit and seven-span transmembrane subunit, which associate at the cell surface as a receptor complex. The encoded protein may play a role in cell adhesion as well as leukocyte recruitment, activation and migration, and contains multiple extracellular EGF-like repeats which mediate binding to chondroitin sulfate and the cell surface complement regulatory protein CD55. Expression of this gene may play a role in the progression of several types of cancer. Alternatively spliced transcript variants encoding multiple isoforms with 3 to 5 EGF-like repeats have been observed for this gene. This gene is found in a cluster with other EGF-TM7 genes on the short arm of chromosome 1</p>		
Other	CD97, CD97 antigen
