<b>Background</b>	gap junction protein gamma 1(GJC1) Homo sapiens This gene is a member of the connexin gene family. The encoded protein is a component of gap junctions, which are composed of arrays of intercellular channels that provide a route for the diffusion of low molecular weight materials from cell to cell. Alternatively spliced transcript variants encoding the same isoform have been described. [provided by RefSeq, Jul 2008],
<b>Other</b>	GJC1, Gap junction gamma-1 protein
