Conjugation	
Background	zinc finger DHHC-type containing 9(ZDHHC9) Homo sapiens This gene encodes an integral membrane protein that is a member of the zinc finger DHHC domain-containing protein family. The encoded protein forms a complex with golgin subfamily A member 7 and functions as a palmitoyltransferase. This protein specifically palmitoylates HRAS and NRAS. Mutations in this gene are associated with X-linked mental retardation. Alternate splicing results in multiple transcript variants that encode the same protein.[provided by RefSeq, May 2010],
Other	ZDHHC9, Palmitoyltransferase ZDHHC9
