Background	lymphocyte antigen 96(LY96) Homo sapiens This gene encodes a protein which associates with toll-like receptor 4 on the cell surface and confers responsiveness to lipopolysaccharide (LPS), thus providing a link between the receptor and LPS signaling. Studies of the mouse ortholog suggest that this gene may be involved in endotoxin neutralization. Alternative splicing results in multiple transcript variants encoding different isoforms. [provided by RefSeq, Sep 2010],
Other	LY96 ESOP1 MD2, Lymphocyte antigen 96 (Ly-96) (ESOP-1) (Protein MD-2)
